

AN1404 4G01 Door Station

Wireless Intercom & Access Control System

Upgrade your property's security with the AN1404 4G Door Station—an advanced, wireless intercom and access control device ideal for entrances, gates, fences, and doors.

Stay Connected, Anywhere

Speak with visitors from any location—whether you're on-site or off-premises. The system uses 4G connectivity and a single SIM card to keep you in touch.

Remote Access Made Simple

During a call: Press * on your phone keypad to release the door or gate.

Authorized call access: Guests can call the unit's SIM number. The system recognizes the number, rejects the call silently, and automatically unlocks the door or gate—at no cost.

Easy Installation & Power Options

Wireless design for flexible placement

Operates on 12–24V AC or DC power

No need for complex wiring or infrastructure

Secure. Smart. Seamless.

The AN1404 4G Door Station puts control at your fingertips—wherever you are.
