AN-T370

Big Button Amplified IP Phone

Overview

The AN-T370 is a powerful big-button amplified IP phone designed for seniors and users with hearing or vision difficulties. With extra loud amplification, large high-contrast buttons, and simple one-touch dialing, it delivers clear, accessible and dependable communication in homes, retirement living and care environments.

Key Features

• Up to 50 dB audio amplification using the Boost button

• Extra-loud ringing volume over 90 dB SPL

• 9 one-touch speed dials (6 photo buttons + 3 memory keys)

• Hands-free speakerphone for convenient calls

• Large, easy-to-see buttons (20mm wide) and illuminated indicator lights

• Hearing aid compatible (HAC) design

• English voice broadcasting for caller ID and dialed numbers

• Desk or wall mountable for flexible installation

• Powered via DC 5V USB-C or PoE
